

## UBT796: PROJECT SEMESTER

|   |   |   |      |
|---|---|---|------|
| L | T | P | Cr   |
| 0 | 0 | 0 | 15.0 |

**Course Objective:** The semester project is aimed to impart an in-depth and thorough training on some specific industrial problems. Such exposures would enable the students to address the various real-time challenges prevalent in biotech-based industries. The students acquire experience and knowledge to work in professional setup. The students will understand the challenges faced by industries and research laboratories and the possible solutions. During this period, the students will get training in the diverse areas of biotechnology

**Scope of Training:** The Students will get opportunity to be a part of ongoing QA, QC, Production, and R&D activities in different industries, commercial enterprises and organization. The students can also join laboratories in research institutes and reputed universities. The students will explore and gain experience in different sectors of biotechnology viz agriculture, food, medicine and pharmaceutical. The students will develop understanding of biosafety, bio-ethic, regulatory and compliances. The students will acquire skill to write, analyze and compile data, and present the detailed technical/scientific report. At the end of successful project semester training, potentially the students become employable in the industries/organizations.

### Laboratory Work (if applicable)

### Course Learning Objectives (CLO)

The students will be able to:

1. work in a team
2. adapt to the varying working environment in industry and research institute
3. identify a problem in biotechnology based industry.
4. formulate a research problem in research laboratory
5. design experiments to solve the industrial/research problem.
6. compile and/or interpret the industrial data.
7. analyze and interpret the experimental data

### Evaluation Scheme:

| Sr. No. | Evaluation Elements                       | Weightage (%) |
|---------|-------------------------------------------|---------------|
| 1.      | Formulation of the problem and objectives | 10            |
| 2.      | Execution of the project                  | 20            |
| 3.      | Results and data interpretation           | 20            |
| 4.      | Technical report                          | 20            |

*Approved in 1st meeting of the Academic Council held on September 11, 2025. Further revision approved in 3rd meeting of the Academic Council held on March 18, 2026, incorporating modification in credits due to the addition of AI courses.*
